

GOTASK

Introduction

POST localhost:8000/users

GET localhost:8000/users/3

POST localhost:8000/posts

GET localhost:8000/posts/1

GET localhost:8000/posts/users/3?index=0

GET localhost:8000/posts/users/3?index=2

Gotask

POST localhost:8000/users

localhost:8000/users

```
{ "id": "1", "name": "abc", "email": "abc@gmail.com", "pass": "xyzefg" }
```

HEADERS
Content-Type application/json

BODY raw

```
{
  "id": "1",
  "name": "abc",
  "email": "abc@gmail.com",
  "pass": "xyzefg"
}
```

GET localhost:8000/users/3

localhost:8000/users/3

POST localhost:8000/posts

localhost:8000/posts

```
{ "uid": "3", "id": "1", "caption": "Lovely Sunny day with Golang !!!", "url": "www.suyz.com" }
```

HEADERS
Content-Type application/json

BODY raw

```
{
  "uid": "3",
  "id": "1",
  "caption": "Lovely Sunny day with Golang !!!",
  "url": "www.suyz.com"
}
```

GET localhost:8000/posts/1

localhost:8000/posts/1

Request for post with id=1

GET localhost:8000/posts/users/3?index=0

localhost:8000/posts/users/3?index=2

all the posts of user id=3 from first post to last post i.e index=0

PARAMS
index 2

GET localhost:8000/posts/users/3?index=2

Example Request

localhost:8000/users

```
curl --location --request POST 'localhost:8000/users' \
--header 'Content-Type: application/json' \
--data-raw '{
  "id": "1",
  "name": "abc",
  "email": "abc@gmail.com",
  "pass": "xyzefg"
}'
```

Example Request

localhost:8000/users/3

```
curl --location --request GET 'localhost:8000/users/3'
```

Example Request

localhost:8000/posts

```
curl --location --request POST 'localhost:8000/posts' \
--header 'Content-Type: application/json' \
--data-raw '{
  "uid": "3",
  "id": "1",
  "caption": "Lovely Sunny day with Golang !!!",
  "url": "www.suyz.com"
}'
```

Example Request

localhost:8000/posts/1

```
curl --location --request GET 'localhost:8000/posts/1'
```

Example Request

localhost:8000/posts/users/3?index=0

```
curl --location --request GET 'localhost:8000/posts/users/3?index=2'
```

Example Request

localhost:8000/posts/users/3?index=2

localhost:8000/posts/users/3?index=2

all the posts of user id=3 from 3rd post to last post i.e index=2

PARAMS

| | |
|-------|---|
| index | 2 |
|-------|---|

```
curl --location --request GET 'localhost:8000/posts/users/3?index=2'
```
